

## Working at Mole Valley District Council

### About us

We operate a first-name terms, dynamic, interesting and lively environment and are an enormously approachable team. There is a very professional ethos here together with a high degree of dedication.

Our Corporate Plan is one of Mole Valley District Council's most strategic documents. It shapes the work of the council and sets out what is most important where MVDC will focus during the life of the Plan

The Corporate Plan, which will run until 2015, is based around three themes of Access to Services, Environment and Value for Money. More information can be found on our website

### Our Offices

Our purpose built open-plan offices are set in parkland containing tennis courts and a bowling green. We are immediately across the road from the Sports Centre which offers a 6 lane 25m swimming pool with learner pool, sports hall, gym, aerobics studio, crèche and café) and Dorking Halls (which provides bars, café, cinema offering new release films and venues providing a range of entertainment from theatrical productions and rock concerts to one man shows).

The offices are only a 2 minute walk from shops in the High Street. For those who travel to work by car we provide free parking alongside the office and the nearest railway stations (Dorking has three!) are just a 5 minute walk away. The M25 runs through the north of the District, with access being only a few minutes drive from the offices.

### The Area

Taking its name from the River Mole the district contains some of the most beautiful countryside in the South of England.

Based in the market town of Dorking, Mole Valley District Council provides services to 80,300 residents across 100 square miles of outstanding Surrey countryside outside the M25 and mid-way between London and the south coast.

We are in classic stockbroker or commuter belt country. Apart from the main conurbations surrounding Dorking and Leatherhead the majority of the area comprises quintessentially English villages dotted amongst beauty spots such as Boxhill, a National Trust designated area of special scientific interest, Leith Hill, Ranmore and Wotton Commons and the White Downs.
